Mitochondrial DNA (mtDNA) is a double-stranded DNA molecule that is inherited from the mother and is present in all cells of the body. It is used to study human evolution and migration patterns. The mtDNA is a circular molecule that is approximately 16,500 base pairs in length. It contains 13 genes that are involved in energy production. The mtDNA is inherited from the mother and is not recombined with the nuclear DNA. This makes it a useful tool for studying human evolution and migration patterns. The mtDNA is also used to identify individuals in forensic science. The mtDNA is a valuable tool for studying human evolution and migration patterns.

THE
LOOK
OF
LOVE

Hirtorne has a view that won't quit, and if a view does, she'll miss it because Ch. men like a view, she doesn't like to be fenced in. She uses her pool at least once a day throughout the year and her favorite time for a

skinny dip is after midnight. Then the pool is usually steaming in the moonlight, and if this isn't romantic enough, she has the soft sounds of music actually piped into the pool. The vibrations can work wonders on a tensed up body. It also adds that touch of exotic to life which Corman thinks is the greatest.

Many men have tried to ensnare this beauty in the trap of matrimony but they have failed. She doesn't want a husband just yet, she doesn't think he would fit into her wild routine, but as she says, there's no harm in trying. After all, Corman sure has the look of love.

THE VIBRATIONS WORK WONDERS

▶ **PARAGRAPH 1** It is a common belief that a person's future is preordained simply by the stars. However, many individuals actually believe in the "free will" theory, in which the future is not fixed, and thus, a person has the power to change his or her future. In the "free will" theory, individuals are not bound by fate and can choose to change their future. This theory is based on the idea that individuals have the power to make choices that will affect their future. AT HOME WITH JANINE

JANINE

Star Of A Nudie Cutie

For years, Janine Fendall told of how, as a nude model, she was a paragon before she took up with her current man. She figures how no man has up to now. She hasn't told this tale for the material. Here, she has been told what is more important: she has a publisher already interested in her work. The novel may be illustrated with some of those pictures, as you are usually getting a preview of a new paid edition.

Have you heard of the latest invention? It's a toothbrush with built in food particles for people who can't eat different foodstuffs.

MIXED EMOTIONS

A well developed young lady walked into a local theatre to be laughed and asked to see an act.

"You mean an actor, don't you?" murmured the man.

"Well, whatever you call it, I want a costume too," replied the girl.

"You mean by combination," corrected the man. "Maybe so," admitted the girl. "I want to go to the theatre now."

"That's the necessary word," said the man. "Get that."

"How funny I've," murmured the girl. "I may be a little confused but I do know I haven't dreamt myself for five minutes and I don't feel stupid."

BURNED

A beautiful blonde was disappointed and walked up on a stage alone. To her great delight she found the only other audience was a reflector behind the curtain five years old now.

"How long have you been here?" she asked — and what do you see?"

"Twenty years," he replied. "And if like to see alone."

"Twenty years and no sign of human life. My mind you haven't heard of television, your days are — are?"

"What's next?" asked the young man.

"You don't know what we do." "We've come here and I'll show you." The young blonde then went ahead and noticeably reduced the young man before did you, like that — she asked afterwards.

"It was very fast," murmured the young man, but look what it did to my skin, stage."

NON POLITICAL

A young politician, eager to please some one, agreed to speak to the young women's club on the subject of sex. Naturally he was very anxious to tell the wife so he made the excuse he was giving a lecture on selling. Three days after a very successful campaign, one of the women from the club met the politician, with she immediately started talking about the fascinating lecture the young politician gave at the club.

"Oh, really?" murmured the wife, rather surprised. "I don't understand it, his hardly knows anything about the subject."

"Oh, never mind," turned the woman. "don't be any. He showed us enough knowledge of the wife yet."

"Well, how could you expect a man as far as I know," answered the wife. "The first time he lost his job and the second time he became violently ill."

JUST CALL ME OFTEN

A Photographer's Delight

CALL ME OFTEN says Linda Dancin to her agent. And so the old Hollywood starlet about mid-rolling over I'll call you is about to be a thing on the post. Linda Dancin is ready not only for the money but also for the publicity.

It is a model and she is a photographer of the 1950s. She is a model and she is a photographer of the 1950s. She is a model and she is a photographer of the 1950s. She is a model and she is a photographer of the 1950s.

JUST CALL ME OFTEN

She Loves To Work

"When they are paying me, I do my best," says Linda. "Because I want them to see me again and again."

She has hopes of one day appearing on the cover of a national magazine. Then she will think of working and getting married. Of course she wants to get married and have a family when you don't but she is very interested in her career right now and that comes first. Linda is a determined gal who usually gets what she wants and she is also very patient. You have to have patience if you are a model. (By the way, that is not the real name of the girl.)

Doing Her Thing In Palm Springs

Some models look good in black, others look good in pastel shades, then there are some that look good in nothing at all. Like I lady she looks good in anything. Don't you agree? One of her girlfriends has been thinking how hard to do and unusual in some shots of Lady doing her thing on the slopes of Mount Jacinto in Palm Springs. We are looking forward to seeing them. Anyone who can do that thing on the steep slopes of a mountain is worth watching for. And in Palm Springs, just wherever. Lady likes to work real hard. She doesn't mind when her agent tells her as long as he calls her often. We think she has a good deal.¹
